Problem Analysis

Why AI Efforts Stall

Most organizations struggle with AI adoption due to fragmented strategies, lack of expertise, and poor data foundations.

70%

of AI projects fail without proper framework

Tool-first pilots without strategy

Unready or siloed data

No governance/guardrails

Limited change management

Skills gap across teams

Disconnected from outcomes

Solution Framework

Human-Centered Approach

01

Start with Workforce Outcomes

- Define success metrics
- Align with business goals
- Measure ROI impact

02

Co-design Workflows

- Involve end users early
- Iterate based on feedback
- Ensure adoption

03

Clean Data Foundation

- Data quality audit
- Secure storage
- Privacy compliance

04

Human-in-the-Loop

- Human oversight
- Responsible AI
- Risk management

05

Pilot & Scale

- 60-90 day pilot
- Measure KPIs
- Scale successful
